Background

The North American Free Trade Agreement established a Transitional Adjustment Assistance Program to provide assistance for workers in firms directly impacted by imports from Canada or Mexico or by shifts in production to those countries. The transitional program provides affected workers with both rapid and early intervention and the opportunity to engage in long-term training while receiving income support. As part of the NAFTA Bridge Program, assistance is also available for workers in firms that were secondarily impacted, e.g. suppliers of components to firms directly impacted or assemblers/ finishers for the primary firm.
