

*** Please Note: UI improper payment data displayed on these web pages are derived from the Benefit Accuracy Measurement (BAM) program. BAM is a quality control statistical survey used to identify errors and support corrective action in the state unemployment insurance (UI) system.

Approximately 24,000 cases are drawn from states annually, with sample sizes ranging from 360 cases per year in the 10 states with the smallest UI workloads to 480 cases in the remainder of the states.
